Professor J.Lederberg,
Dept. of Genetics,
Stanford University,
Stanford,
California, U.S.A.

Dear Dr Lederberg,

Thank you for your very interesting letter. I think you are most certainly right in that the earth accretes quantities of N in the form of meteoritic material, but as you point out the quantities are probably low. I enclose an account of further work in which you might be interested and will send on a reprint of the letter to Nature when they arrive from England.

Yours sincerely,

A.T. Wilson
